Filtration & Separation
incorporating: DUST CONTROL, AIR & GAS CLEANING

INDEX
1989
VOL 26: NOS 1-6

The SUBJECT INDEX has been produced from the titles of all the articles in Filtration & Separation in 1989. The Keywords from each title (excluding common or noise words) are included and arranged alphabetically. To the right of each keyword appear the first 95 characters of the title and a five digit code. The code refers to the starting page of the article. The first two digits represent the year and the last three the page number - i.e. 89032 refers to page 32 for 1989. The AUTHOR INDEX lists all authors with the same code.

PAGE NUMBERS Jan/Feb: 1-72 Mar/Apr: 73-144 May/Jun: 145-224 Jul/Aug: 225-312 Sep/Oct: 313-384 Nov/Dec: 385-456

air filter	Temporal changes in oil and air filter performance due to dust deposition.	89368
automation	Importance of automation in flue gas desulphurisation control system	89090
batch	Making batch and continuous filter presses better known.	89402
beer	Using ceramic microfiltration for the filtration of beer and recovery of extract.	89198
belt filter	An analysis of belt filter press dewatering mechanism.	89364
bopp	Why fine wire mesh and cloth has never been such good value.	89018
bowl	Factors affecting the dewatering of small particles in perforate bowl centrifuges.	89348
cake	A patchy-cleaning interpretation of dust cake release from non-woven fabrics.	89187
cakes	Internal pressure variations during the filtration and dewatering of thick cakes.	89181
cakes	Optimising candle filters for incompressible cakes.	89436
calcium sulphate	Filtration and washing of calcium sulphate/phosphoric acid slurries.	89105
candle	Optimising candle filters for incompressible cakes.	89436
centrifuge	A pusher centrifuge with brilliant prospects.	89148
centrifuge	Advances made in perfecting an entirely new centrifuge.	89398
centrifuge	Heavy soda separation tests on a pusher centrifuge.	89326
centrifuges	Centrifuges replace rotary-drum vacuum filter on sodium carbonate.	89234
centrifuges	Factors affecting the dewatering of small particles in perforate bowl centrifuges.	89348
ceramic	Rigid ceramic media for filtering hot gases.	89265
ceramic	Using ceramic microfiltration for the filtration of beer and recovery of extract.	89198
cleanable	Combined separation and retainment of particulate and gaseous matter with cleanable filters.	89414
cloth	Why fine wire mesh and cloth has never been such good value.	89018
colloid	Colloid science in solid-liquid separation technology.	89277
compressors	Separation of oil downstream of lubricated high-pressure compressors.	89191
continuous	Making batch and continuous filter presses better known.	89402
cyclone	Cyclone optimisation.	89272
decanter	Three-phase separation of heavy and light liquids/solids by double-canted decanter.	89357
deposition	Temporal changes in oil and air filter performance due to dust deposition.	89368
desulphurisation	Importance of automation in flue gas desulphurisation control systems.	89090
dewatering	An analysis of belt filter press dewatering mechanism.	89364
dewatering	Developing an empirical model for dewatering - and its application to peat.	89053
dewatering	Factors affecting the dewatering of small particles in perforate bowl centrifuges.	89348
dewatering	Internal pressure variations during the filtration and dewatering of thick cakes.	89181
disposal	Getting to grips with wastewater sludge disposal.	89234
diverter	Application of a fluidic diverter to high gradient magnetic filtration systems.	89114
double-canted	Three-phase separation of heavy and light liquids/solids by double-canted decanter.	89357
downstream	Separation of oil downstream of lubricated high-pressure compressors.	89191
drum filter	Developing a rotary-drum vacuum filter to world standards.	89010
dust	A patchy-cleaning interpretation of dust cake release from non-woven fabrics.	89187
dust	Changing patterns in dust filtration research.	89036
dust	Filtration resistance of electrically-charged dust.	89194
dust	Temporal changes in oil and air filter performance due to dust deposition.	89368
dynamic	Dynamic filtration in obtaining high purity materials - modelling of the washing process.	89343
dynamic	Resistance model for high-shear dynamic filtration.	89418
effluents	Particle characterisation in wastewater effluents in relation to filtration and irrigation.	89284
electric charge	Effect of electric charge in filter materials.	89046
electric charge	Filtration resistance of electrically-charged dust.	89194
emulsions	Particle size analysis of emulsions: evaluation of methods	89352
fabrics	A patchy-cleaning interpretation of dust cake release from non-woven fabrics.	89187
faudi finebau	Celebrating 50 years of advanced filtration development.	89020
fertiliser	Chemical fertiliser production picks up ... but where is the equipment?	89082
filter	Applicability of filter tests for extreme industrial sludges.	89288
filter	Effect of electric charge in filter materials.	89046
filter	Making batch and continuous filter presses better known.	89402
filtering	Rigid ceramic media for filtering hot gases.	89265
filters	Combined separation and retainment of particulate and gaseous matter with cleanable filters.	89414
filters	Optimising candle filters for incompressible cakes.	89436
filtration	Applying filtration and separation techniques for improved health.	89127
filtration	Celebrating 50 years of advanced filtration development.	89020
filtration	Changing patterns in dust filtration research.	89036
filtration	Design optimisation of melt polymer filtration system.	89043
filtration	Dynamic filtration in obtaining high purity materials - modelling of the washing process.	89343
filtration	Filtration and washing of calcium sulphate/phosphoric acid slurries.	89105
filtration	Filtration resistance of electrically-charged dust.	89194
filtration	Internal pressure variations during the filtration and dewatering of thick cakes.	89181
filtration	Making the case for the multiphase filtration theory.	89295
filtration	Particle characterisation in wastewater effluents in relation to filtration and irrigation.	89284
filtration	Rapid gravity filtration - towards a better understanding.	89032
filtration	Resistance model for high-shear dynamic filtration.	89418
filtration	Using ceramic microfiltration for the filtration of beer and recovery of extract.	89198
flocculation	Effectiveness of helical pipes in the flocculation process of water.	89422
flue gas	Importance of automation in flue gas desulphurisation control systems.	89090
fluidic	Application of a fluidic diverter to high gradient magnetic filtration systems.	89114
gaseous	Combined separation and retainment of particulate and gaseous matter with cleanable filters.	89414
gases	Rigid ceramic media for filtering hot gases.	89265
gravity	Rapid gravity filtration - towards a better understanding.	89032
hazardous	Incineration of surplus sludge and hazardous waste - rehabilitation of inherited pollution.	89100
health	Applying filtration and separation techniques for improved health.	89127
helical	Effectiveness of helical pipes in the flocculation process of water.	89422
hepa filtration	Making sense of HEPA filtration.	89439

high-pressure	Separation of oil downstream of lubricated high-pressure compressors.	89191
high-shear	Resistance model for high-shear dynamic filtration.	89418
high gradient	Application of a fluidic diverter to high gradient magnetic filtration systems.	89114
high purity	Dynamic filtration in obtaining high purity materials - modelling of the washing process.	89343
hot	Rigid ceramic media for filtering hot gases.	89265
incineration	Incineration of surplus sludge and hazardous waste - rehabilitation of inherited pollution.	89100
incompressible	Optimising candle filters for incompressible cakes.	89436
index of refraction	Examining the influence of index of refraction on particle size measurements - using a +	89121
irrigation	Particle characterisation in wastewater effluents in relation to filtration and irrigation.	89284
krauss maffei	Renewed vigour as 150-year-old process engineering company looks to the future.	89024
lubricated	Separation of oil downstream of lubricated high-pressure compressors.	89191
magnetic filtration	Application of a fluidic diverter to high gradient magnetic filtration systems.	89114
media	Rigid ceramic media for filtering hot gases.	89265
melt	Design optimisation of melt polymer filtration system.	89043
mesh	Why fine wire mesh and cloth has never been such good value.	89018
microfiltration	Using ceramic microfiltration for the filtration of beer and recovery of extract.	89198
model	Developing an empirical model for dewatering - and its application to peat.	89053
model	Resistance model for high-shear dynamic filtration.	89418
modelling	Dynamic filtration in obtaining high purity materials - modelling of the washing process.	89343
multiphase	Making the case for the multiphase filtration theory.	89295
non-woven	A patchy-cleaning interpretation of dust cake release from non-woven fabrics.	89187
oil	Separation of oil downstream of lubricated high-pressure compressors.	89191
oil filter	Temporal changes in oil and air filter performance due to dust deposition.	89368
optical	Examining the influence of index of refraction on particle size measurements - using a +	89121
particle counter	Examining the influence of index of refraction on particle size measurements - using a +	89121
particle size	Examining the influence of index of refraction on particle size measurements - using a +	89121
particle size	Particle size analysis of emulsions: evaluation of methods	89352
patchy-cleaning	A patchy-cleaning interpretation of dust cake release from non-woven fabrics.	89187
peat	Developing an empirical model for dewatering - and its application to peat.	89053
perforate	Factors affecting the dewatering of small particles in perforate bowl centrifuges.	89348
phosphoric acid	Filtration and washing of calcium sulphate/phosphoric acid slurries.	89105
pipes	Effectiveness of helical pipes in the flocculation process of water.	89422
pollution	Incineration of surplus sludge and hazardous waste - rehabilitation of inherited pollution.	89100
polymer	Design optimisation of melt polymer filtration system.	89043
press	An analysis of belt filter press dewatering mechanism.	89364
presses	Making batch and continuous filter presses better known.	89402
pressure	Internal pressure variations during the filtration and dewatering of thick cakes.	89181
pusher	A pusher centrifuge with brilliant prospects.	89148
pusher	Heavy soda separation tests on a pusher centrifuge.	89326
research	Changing patterns in dust filtration research.	89036
resistance	Filtration resistance of electrically-charged dust.	89194
resistance	Resistance model for high-shear dynamic filtration.	89418
retainment	Combined separation and retainment of particulate and gaseous matter with cleanable filters.	89414
rotary-drum	Centrifuges replace rotary-drum vacuum filter on sodium carbonate.	89234
rotary	Developing a rotary-drum vacuum filter to world standards.	89010
separation	Applying filtration and separation techniques for improved health.	89127
separation	Colloid science in solid-liquid separation technology.	89277
separation	Combined separation and retainment of particulate and gaseous matter with cleanable filters.	89414
separation	Heavy soda separation tests on a pusher centrifuge.	89326
separation	Separation of oil downstream of lubricated high-pressure compressors.	89191
separation	Three-phase separation of heavy and light liquids/solids by double-canted decanter.	89357
sewage	Solving the problems of water and sewage treatment.	89094
simpson thomson	Dust filter specialists celebrate 150th anniversary.	89025
sludge	Getting to grips with wastewater sludge disposal.	89234
sludge	Incineration of surplus sludge and hazardous waste - rehabilitation of inherited pollution.	89100
sludges	Applicability of filter tests for extreme industrial sludges.	89288
slurries	Filtration and washing of calcium sulphate/phosphoric acid slurries.	89105
soda	Heavy soda separation tests on a pusher centrifuge.	89326
sodium carbonate	Centrifuges replace rotary-drum vacuum filter on sodium carbonate.	89234
solid-liquid	Colloid science in solid-liquid separation technology.	89277
tests	Applicability of filter tests for extreme industrial sludges.	89288
three-phase	Three-phase separation of heavy and light liquids/solids by double-canted decanter.	89357
time-of-transition	Examining the influence of index of refraction on particle size measurements - using a +	89121
turbulent	Developing a batch turbulent washer with low water requirements.	89430
vacuum filter	Centrifuges replace rotary-drum vacuum filter on sodium carbonate.	89234
vacuum filter	Developing a rotary-drum vacuum filter to world standards.	89010
washer	Developing a batch turbulent washer with low water requirements.	89430
washing	Dynamic filtration in obtaining high purity materials - modelling of the washing process.	89343
washing	Filtration and washing of calcium sulphate/phosphoric acid slurries.	89105
waste	Incineration of surplus sludge and hazardous waste - rehabilitation of inherited pollution.	89100
wastewater	Getting to grips with wastewater sludge disposal.	89234
wastewater	Particle characterisation in wastewater effluents in relation to filtration and irrigation.	89284
wastewater	Sao Paulo gets to grips with its wastewater treatment problems.	89403
water	Developing a batch turbulent washer with low water requirements.	89430
water	Effectiveness of helical pipes in the flocculation process of water.	89422
water	Solving the problems of water and sewage treatment.	89094
water	Water, its quality and you!	89204
wire	Why fine wire mesh and cloth has never been such good value.	89018
